

Aníbal Fernandois

AI Infrastructure & Full-Stack Software Engineer

anibal.fernandois@gmail.com +569-6617-0056 [linkedin.com/anibal-fernandois](https://www.linkedin.com/in/anibal-fernandois) www.anibalfernandois.com

POSITIONING

Software engineer and Industrial Civil Engineering student focused on AI infrastructure, automation, analytics, and full-stack product delivery. I work well where the problem is not fully specified yet: defining metrics, testing assumptions, building the system, and turning results into operational decisions.

EXPERIENCE

Falabella [Planning and Development Engineer](#) May 2026 – Present

- Explore historical BigQuery data with Python, pandas, and polars to define metrics, filters, and assumptions for store allocation and replenishment policy.
- Test models, inspect nonlinear behavior, patch inconsistent data, and convert analysis into concrete recommendations for future supply decisions.

Buda.com [Automation and AI Intern](#) Aug 2025 – Dec 2025

- Led research and production deployment of an enterprise AI chatbot integrating complex APIs, Contextual Chunking, HyDE, and context engineering, reaching above 95% answer accuracy.
- Built high-precision retrieval with Contextual Embedding and MultiVector Indexing, improving relevance across internal knowledge sources.
- Architected robust n8n automation pipelines for critical company workflows, balancing reliability, maintainability, and speed.

Nikola Chile [Full-Stack Developer](#) Mar 2025 – Aug 2025

- Designed and shipped the high-performance Next.js and Django architecture for [nikola.cl](#), owning frontend, backend, deployment, and quality decisions.
- Led migration from legacy systems to scalable web architecture with automated code-quality pipelines and infrastructure visibility.
- Recognized for leadership and delivery on the current company website.

Preuniversitario Preulng UC [Teacher](#) 1 year

Proyecto Going UC [Teacher](#) 1 year

Debates Constitucionales [Head Teaching Assistant](#) 2 years

SELECTED PROJECTS

- **Bea's Corner** – Astro marketplace scraper that centralizes makeup pricing and availability across Chilean retailers.
- **BCI Beneficios** – Faster, more usable BCI+ discounts experience with filters, categories, minimums, and caps.
- **Mi Carrito** – Price comparison platform using automated scrapers for Chilean supermarkets.

EDUCATION

Pontificia Universidad Católica de Chile – Industrial Civil Engineering, Computing Diploma 2020 – Present
Frontend Development Certificate, Launchpad.

STACK

Languages: Python, JavaScript, TypeScript, Mojo, C, SQL

Tools: Django, Astro, Next.js, React, n8n, Postgres, MongoDB, AWS, Vercel, Render

Human languages: English C1 TOEFL, French B1 ICP Université, Spanish native
